Installation

The system integrates with Asterisk - the Open Source PBX! (www.asterisk.org). All software is additional to Asterisk and no modifications were made to the Asterisk source. Asterisk must be obtained and configured separately.

There are several components to this system. All of the sub-directories contain README files that discuss purpose, installation and configuration.

As implemented, the configuration files expect this directory structure to be unpacked in /opt/internetnz.

So:

```
mkdir /opt/internetnz
cd /opt/internetnz
unzip PUA.zip          or tar xjvf PUA.tar.bz2
```

Alternatively unpack the files in a directory of your choice and create a symbolic link for that directory to /opt/internetnz.

For technical queries please contact Andrew Ruthven <andrew.ruthven@catalyst.net.nz>.
